

Dr. MONTHER M. TAHAT

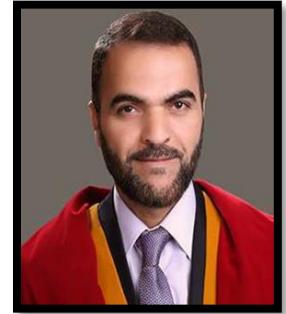

PERSONAL PROFILE:

Name: Monther Mohumad Yuesef Tahat

Place of Birth: As-Sareeh-Irbid-Jordan

Religion: Al-Islam

Nationality: Jordanian

ACADEMIC RANK:

Title: Associate Professor of Plant Pathology (Soil Microbiology).

CURRENT ADDRESS:

-Department of Plant Protection, School of Agriculture,

The University of Jordan, Amman, 11942 Jordan,

📞 : +962 6 5355000 (22516)

Mobile 📲 : 00962-77-7714813

WEB SITES:

Emails✉ : m.tahat@ju.edu.jo , monthertahat@gmail.com , monther777@gmx.com

EDUCATION:

-PhD. 2004-2009, Department of Plant Protection, Faculty of Agriculture, University Putra Malaysia, Malaysia.

-Thesis title: **Mechanisms involved in the biological control of tomato bacterial wilt caused by *Ralstonia solanacearum* using arbuscular mycorrhizal fungi.** University Putra Malaysia (2009).

-M.Sc. 2000-2001, Department of Plant Protection, Faculty of Agriculture, University of Jordan, Jordan.

Thesis title: **Effect of two *Glomus* species and *Verticillium dahliae* on cucumber growth under greenhouse conditions.**

-B.Sc. 1996-1997, Department of Plant Protection, Faculty of Agriculture, Basrah University, Republic of Iraq.

WORK EXPERIENCE:

-Current Employee: Associate Professor of Plant Pathology/University of Jordan/School of Agriculture/ Department of Plant Protection/Amman/Jordan (12/7/2020).

-Assistant Dean for Agricultural Stations Affairs (2023-2024).

-Employee at University Putra Malaysia-Faculty of Agriculture- Plant Protection Department Post-Doctoral Researcher (21/1/2010-21/1/2014).

-Employee at: Ministry of Agriculture-Jordan (30/7/2003-6/12/2004).

-Employee at: National Center of Agricultural Research and Technology (2/12/2001-3/8/2003).

TEACHING EXPERIENCE:

-Assistant Professor of Plant Pathology/University of Jordan. Amman/Jordan (from 3/3/2015 to 7/12/2020)

RESEARCH EXPERIENCE:

-Research assistant (1999-2001). University of Jordan/Department of Plant Protection.

-Post Doctorate, Department of Plant Protection, Faculty of Agriculture, University Putra Malaysia, Malaysia. 2010-2014.

5-Tahat, M. M., (2022). *Glomus mosseae* efficiency on the growth of different *Vinca rosea* cultivars (Writing).

ONGOING RESEARCH:

1-The Potential of Using Endomycorrhizal Fungi to Control the Damping-off Disease on Strawberries and to Enhance the Morphological and Physiological Properties of the Fruit (started in 2019). funded by the Deanship of Academic Research/ University of Jordan.

2-Survey and Evaluation of the Impact of Using Different Physical and Biological Methods in Controlling Panama Disease in Jordan Valley (started in 2016-closed 13\8\2018). (Funded by the Ministry of Higher Education). Amman/Jordan

3-Survey and characterization of wheat stem rust in Jordan (started in 2019). funded by the Deanship of Academic Research/ University of Jordan

4-The influence of indigenous arbuscular mycorrhizal fungi inoculation on the growth and flower quality of Gerbera at different salinity levels (Started in 2018-Closed 2022). funded by the Deanship of Academic Research/University of Jordan.

5-Collecting and characterizing wheat stem rust *Puccinia graminis* in Jordan using molecular techniques (funded by ABDUL HAMEED SHOMAN Foundation) (started 2020).

GRADUATE STUDENT SUPERVISION:

1.Khalefah Gomaa Bo-farraj (2016). Biological control of pepper root rots disease by using arbuscular mycorrhizal fungi and olive cake. (Master thesis/ University of Jordan).

GRADUATE STUDENT COMMITTEES:

1-Osam Al-Arabi (2017). Influence of three *Bacillus* spp. on different parameters of cauliflower plant growth when tested on tobacco whitefly *Bemisia tabaci* (gennadius) (Homoptera: Aleyrodidae) (Master Thesis/University of Jordan).

2-Mohamad Assad Ibrahim (2018). Biological Control of *Sclerotinia sclerotiorum* by Indigenous Bacteria Isolates (Master Thesis/Jordan University of Sciences and Technology).

3-Noor Sameh Abo-Shanab (2021). (Master Thesis/University of Jordan).

RESEARCH INTEREST:

-Mycorrhizal fungi as biocontrol agents against plant diseases (Fungi, Bacteria, Spiroplasma, Phytoplasma).

-Mycorrhizal fungi culturing and manipulation in a large scale.

- Management of soil-borne disease using beneficial microbes (AMF, *Trichoderma* spp., Actinomycets, PGPR).
- Phyto-pathogenic bacteria (control, management, beneficial).
- AMF as bio-fertilizers for poor soil.
- Plant soil and microbe interactions.
- Plant disease epidemiology.
- Field crop disease.
- Forest diseases.

PROFESSIONAL MEMBERSHIPS:

- Member of Agricultural Engineer Association/ Jordan, from 1997-present.
- Member of the Malaysian Society for Microbiology, from 2007-Present).
- Arab Society for Plant Protection. 2002- Present.

TEACHING COURSES:

- 1-Plant Fungal Diseases.
 - 2-Phyto-Pathogenic Bacteria.
 - 3-Principles of Plant Protection.
 - 4-Seminar in Plant Protection.
 - 5-Special Training in Plant Protection
 - 6-Practical and Training Course (Alghour Course).
 - 7-Campus Life and Ethics.
 - 8-Beneficial Fungi
 - 9- Weed Science
 - 10-Weed Control and Management (Master students).
 - 11-Entrepreneurship and Innovation
 - 12-Special Training in Plant Protection
- lalbanna@ju.edu.jo.
